Report of Independent Auditors

To the Board of Trustees and Members of
American Municipal Power, Inc.

We have audited the accompanying consolidated financial statements of American Municipal Power, Inc. and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 2017 and 2016, and the related consolidated statements of revenues and expenses, of changes in member and patron equities, and of cash flows for the years then ended.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Company's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of American Municipal Power, Inc. and its subsidiaries as of December 31, 2017 and 2016, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

1. Description of Business

American Municipal Power, Inc. (“AMP”) is a not-for-profit Ohio corporation organized to provide electric capacity and energy and to furnish other services to its members on a cooperative basis. AMP is a tax-exempt organization for federal tax purposes under Section 501(c)(12) of the Internal Revenue Service Code (“IRC”). As AMP derives its income from the exercise of an essential government function and will accrue to a state or a political subdivision thereof; AMP’s income is excludable from gross income under IRC Section 115. AMP is a membership organization comprised of 84 municipalities throughout Ohio, 29 municipalities in Pennsylvania, six municipalities in Michigan, six municipalities in Kentucky, five municipalities in Virginia, two municipalities in West Virginia, one municipality in Indiana, one municipality in Maryland, and one joint action agency in Delaware, all but one of which own and operate electric systems. AMP purchases and generates electric capacity and energy for sale to its members. AMPO, Inc. is a for profit subsidiary that provides electric and natural gas aggregation consulting services to both members and nonmembers in Ohio.

In addition, AMP serves as a project manager for Ohio members participating in joint venture projects to share ownership of power generation and transmission facilities, known as Ohio Municipal Electric Generation Agency Joint Ventures: 1, 2, 4, 5, and 6 (“OMEGA” “JV1,” “JV2,” “JV4,” “JV5,” and “JV6”) (collectively, the “OMEGA Joint Ventures”). AMP is closely aligned with Ohio Municipal Electric Association (“OMEA”), the provider of legislative liaison services to AMP and 80 Ohio public power communities. AMP members have also formed Municipal Energy Services Agency (“MESA”) whose purpose is to provide administrative, management and technical services to AMP, its members, OMEA and the OMEGA Joint Ventures.

AMP has received approval pursuant to a private letter ruling from the Internal Revenue Service (“IRS”) to issue tax-exempt securities on behalf of its members. In connection with the financing of projects undertaken by the electric systems of certain member communities, AMP has issued tax exempt debt on their behalf. Additionally, AMP has issued tax-exempt bonds to finance the construction of its generating projects.

AMP 368 LLC (“AMP 368”), a wholly owned and consolidated subsidiary of AMP, is the owner of a 23.26%, or 368 MW, undivided interest in the Prairie State Energy Campus (“PSEC”). PSEC, located in Washington County, Illinois, includes a coal-fired generating plant and adjacent coal mine.

Meldahl LLC, a wholly owned and consolidated subsidiary of AMP, is the owner of the 105 MW Meldahl project, a run-of-the river hydroelectric facility on the Ohio River near Maysville, Kentucky.

2. Summary of Significant Accounting Policies

Basis of Consolidation

The consolidated financial statements include the accounts of AMP and its wholly owned subsidiaries, AMPO, Inc., Meldahl LLC, and AMP 368. All intercompany transactions have been eliminated in the preparation of the consolidated financial statements.

Utility Plant

AMP records amounts expended in connection with the purchase or construction of utility plant assets at cost. Major renewals, betterments and replacements are capitalized, while maintenance and repair costs are charged to operations as incurred. Operations are charged with labor, material, supervision and other costs incurred to maintain the utility plant. When utility plant assets

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

are retired, accumulated depreciation is charged with the cost of assets, plus removal costs, less any salvage value, and any resulting gain or loss is reflected in other nonoperating revenues (expenses), net in the consolidated statements of revenues and expenses.

Depreciation on utility plant assets is provided for by the straight-line method over the estimated useful lives of the property. The provisions are determined primarily by the use of functional composite rates as follows:

Production, plant	5%-10%
Transmission plant	5%
General plant	5%-33%
Station equipment	4.4%-20%

Nonutility Property and Equipment

Nonutility property and equipment is recorded at cost. Major renewals, betterments and replacements are capitalized, while maintenance and repair costs are charged to operations as incurred. When nonutility property and equipment is retired or otherwise disposed of, the related cost and accumulated depreciation are removed from the accounts, and the related gains or losses are reflected in other nonoperating revenues (expenses), net in the consolidated statements of revenues and expenses.

Depreciation on nonutility property and equipment is provided for on the straight-line method over the estimated useful lives of the property as follows:

Building	25 years
Furniture and equipment	5-10 years
Computer software	3-5 years
Vehicles	3-5 years

Construction Work-in-Progress

AMP records amounts expended in connection with construction work-in-progress projects at cost. Upon completion of a project, AMP places the asset in service and the related costs are recorded as either utility plant or nonutility property and equipment.

Plant Held for Future Use

In November 2009, the participants in the AMP Generating Station Project (the "AMPGS Project") voted to terminate the development of the pulverized coal power plant in Meigs County, Ohio. The AMPGS Project was to be a 1,000 MW base load, clean-coal technology plant scheduled to go on-line in 2014. This pulverized coal plant was estimated to be a \$3 billion project, but the project's targeted capital costs increased by 37% and the engineer, procure and construct contractor could not guarantee that the costs would not continue to escalate. At the termination date, minimal construction had been performed on the AMPGS Project at the Meigs County site. AMP still intends to develop this site for the construction of a generating asset; however, at December 31, 2017, the type of future generating asset had not been determined.

The AMPGS Project participants signed "take or pay" contracts with AMP. As such, the participants of the project are obligated to pay any costs incurred for the project.

As a result of the decision to terminate further development of a coal plant at AMPGS, the AMPGS Project costs have been reclassified out of construction work-in-progress and into plant held for

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

future use or regulatory assets in the consolidated balance sheets. At December 31, 2010, AMP reclassified \$34,881,075 of costs to plant held for future use in the consolidated balance sheets. These costs were determined to be associated with the undeveloped Meigs County site regardless of the type of generating asset ultimately developed on the site.

The remaining costs previously incurred were determined to be impaired but reclassified as a regulatory asset which is fully recoverable from the AMPGS Project participants as part of their unconditional obligation under the "take or pay" contract. These stranded costs are being recovered through collections from Participants and Members over a 15 year term and from service fee and other member related revenues over the same term. At December 31, 2017, AMP has a remaining regulatory asset of \$23,905,151 for the recovery of these abandoned construction costs.

Impairment of Long-lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that full recoverability is questionable. The determination of whether an impairment has occurred is based on an estimate of undiscounted future cash flows attributable to the assets, as compared with the carrying value of the assets. If an impairment has occurred, the amount of the impairment recognized is the excess of the carrying value of the assets over fair value of the assets.

Coal Reserves

AMP has purchased coal reserves in conjunction with the construction of the PSEC. The coal reserves are recorded at cost. AMP also has a contractual right of first refusal for additional coal reserves. These reserves are valued at \$22,750,012 and \$23,537,987 (net of depletion) as of December 31, 2017 and 2016, respectively. Depletion occurs as the coal reserves are mined.

Trustee Funds

AMP maintains funds on deposit with the trustees ("trustee funds") under its various trust indentures securing bonds issued for its various projects. Investments of the trustee funds include money market funds and debt securities. The debt securities are classified as held-to-maturity in accordance with Accounting Standards Codification ("ASC") 320 *Investments – Debt and Equity Securities*, and are recorded at amortized cost. The debt securities mature at various dates through February 2046. The money market funds are valued at the net asset value of the underlying fund determined on the valuation date.

Realized gains and losses on investment transactions are determined on the basis of specific identification. Gross unrealized holding gains at December 31, 2017 and 2016 were \$1,509,944 and \$3,815,400, respectively. Gross unrealized holding gains and losses are included in other, net in the consolidated statements of revenues and expenses.

On October 6, 2016, AMP issued, pursuant to the Hydro MTI, its Combined Hydroelectric Project 2016A Revenue Bonds ("Hydro 2016A Bonds") (see Note 9). A portion of the proceeds of the Hydro 2016A Bonds were applied to refund a portion of the Hydro 2009C Bonds. To effect the refunding, a sufficient amount of the proceeds of the Hydro 2016A Bonds and certain other available amounts were deposited in an escrow account (the "Escrow Fund") established by AMP with the Escrow Agent and were invested in Defeasance Obligations that mature in amounts and pay interest at rates sufficient to pay, when due, the principal, applicable redemption premiums, if any, and interest on the above-referenced bonds through their respective maturity or redemption dates, as applicable. The sufficiency of the Escrow Fund, including Defeasance Obligations and the income thereon, to pay such amounts were verified by a third party CPA firm. On the date of issuance of the Hydro 2016A Bonds, the Escrow Agent was given irrevocable instructions to call

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

the callable Hydro 2009C Bonds for redemption on February 15, 2020, at the redemption price of 100%.

On November 30, 2017, AMP issued, pursuant to the PSEC Master Trust Indenture (“MTI”), its Prairie State Energy Campus Project 2017A Revenue Bonds (see Note 9). A portion of the proceeds of the PSEC 2017A Bonds and other available funds under the MTI were applied to refund the PSEC 2008A Bonds and PSEC 2009A Bonds. To effect the refunding, a sufficient amount of the proceeds of the Series 2017A Bonds and certain other available funds under the MTI were deposited in an escrow account (the “Escrow Fund”) established by AMP with U.S. Bank National Association (the “Escrow Agent”), and were invested in certain noncallable direct obligations or obligations the principal of and interest on which are unconditionally guaranteed by the United States of America (“Defeasance Obligations”) that mature in amounts and pay interest at rates sufficient to pay, when due, the principal, applicable redemption premiums, if any, and interest on the above-referenced bonds through their respective maturity or redemption dates, as applicable. The sufficiency of the Escrow Fund, including Defeasance Obligations and the income thereon, to pay such amounts were verified by a third party CPA firm. On the date of issuance of the PSEC 2017A Bonds, the Escrow Agent was given irrevocable instructions to call the callable PSEC 2008A Bonds for redemption on February 15, 2018 and the callable 2009A Bonds for redemption on February 15, 2019, each at the redemption prices of 100%.

On December 20, 2017, AMP issued, pursuant to the AFEC Master Trust Indenture, its AMP Fremont Energy Campus Project 2017A Revenue Bonds (see Note 9). A portion of the proceeds of the AFEC 2017A Bonds and other available funds under the Indenture, were applied to refund the AFEC 2012B Bonds. To effect the refunding, a sufficient amount of the proceeds of the Series 2017A Bonds and certain other available funds under the Indenture were deposited in an escrow account (the “Escrow Fund”) established by AMP with U.S. Bank National Association (the “Escrow Agent”), and were invested in certain noncallable direct obligations or obligations the principal of and interest on which are unconditionally guaranteed by the United States of America (“Defeasance Obligations”) that mature in amounts and pay interest at rates sufficient to pay, when due, the principal, applicable redemption premiums, if any, and interest on the above-referenced bonds through their respective maturity or redemption dates, as applicable. The sufficiency of the Escrow Fund, including Defeasance Obligations and the income thereon, to pay such amounts were verified by a third party CPA firm. On the date of issuance of the AFEC 2017A Bonds, the Escrow Agent was given irrevocable instructions to call the callable AFEC 2012B Bonds for redemption on February 15, 2022 at the redemption prices of 100%.

Financing Receivable—Members

Financing receivable - members is comprised of debt service obligations on AMP’s limited recourse tax-exempt debt issued on behalf of its members (Note 9).

In connection with the issuance of municipal project notes, AMP has entered into loan agreements with individual member communities. The terms of these loan agreements provide that the member community will issue its note to AMP in the same amount as the related AMP project note. The member community note issued to AMP is payable solely from the net revenue of the member community’s electric system. Certain of these loan agreements also provide that a portion of the proceeds from the issuance of municipal project notes shall be deposited in a project fund held for the purpose of making payments of project costs as designated by the member community. The project fund amounts are invested at the direction of the member community and are disbursed by AMP upon submission of a payment requisition satisfactory to AMP. Project fund deposits are restricted to the payment of designated project costs.

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

Investment in The Energy Authority

On January 1, 2014 AMP entered into a membership agreement with The Energy Authority (“TEA”). As a condition of membership, AMP is subject to TEA operations and settlement procedures as AMP receives services from TEA for dispatch services and natural gas management. AMP is also subject to guaranty agreements where if TEA is unable to deliver capacity, energy or gas obligations, AMP is obligated to pay that amount to relevant counterparties the extent of the guaranty limit, which is \$28,928,571 for capacity and energy and \$5,000,000 for natural gas. AMP accounts for their ownership interest in TEA as a cost method investment.

Intangible and Other Assets

Included in intangible assets are two interconnections contracts for offsite facilities which were a part of the acquisition cost for the AMP Fremont Energy Center (“AFEC”) project. These contracts were valued at \$28,665,190, and were net of \$4,586,430 and \$3,822,025 of accumulated amortization as of December 31, 2017 and 2016, respectively. The contracts are being amortized over a 37.5 year period at a rate of \$764,405 per year, which is recognized in depreciation and amortization.

Prepaid Assets

During 2017, AMP prepaid for a long-term power supply agreement (the “Prepaid Agreement”) which is included in prepaid assets in the accompanying consolidated balance sheets. The total amount of the Prepaid Agreement was \$40,749,014 and is for a 25-year period. AMP is amortizing the cost of the power over the life of the Prepaid Agreement. AMP records the amount expected to be amortized over the next twelve months as a current asset in the accompanying consolidated balance sheets, which was \$993,378 as of December 31, 2017. AMP has concluded that the Prepaid Agreement qualifies for a normal purchase sale exemption in accordance with FASB’s standard on accounting for derivative instruments.

Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, cash equivalents consist of highly-liquid cash and short-term investments with original maturities of three months or less.

Collateral Postings

At December 31, 2017 and 2016, AMP posted collateral deposits to the bank accounts of certain of its power suppliers related to long-term power supply agreements with the suppliers and collateral deposits with insurance companies in connection with long-term construction projects. AMP also has collateral posted to Midwest Independent Transmission System Operator, Inc. (“MISO”) for the ability to participate in auctions for future transmission rights (“FTRs”). AMP has recorded these collateral postings as current assets in the accompanying consolidated balance sheets. The impact of utilizing FTRs is included in the transmission cost of purchased power.

Concentration of Credit Risk and Accounts Receivable

AMP periodically maintains cash balances in excess of the federally insured limit. At December 31 2017 and 2016, 19% of revenue and 17% of accounts receivable were due from two customers in each year.

Inventories

Inventories consist of fuel inventory and materials and supplies inventories. Fuel inventory is the recorded amount of unused coal inventory at PSEC. This amount is verified semi-annually by a third party and is valued at the weighted average cost. Materials and supplies inventories are recorded at average cost. These items are used primarily for maintenance and daily operational requirements.

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

Member and Patron Equities

Contributed capital represents initial capital contributions made by members. Should AMP cease business, these amounts, if available, will be returned to the members, and any available patronage capital will also be distributed to members and former members based on their patronage of AMP while they were members.

Asset Retirement Obligations

AMP records, at fair value initially, legal obligations associated with the retirement or removal of long-lived assets that can be reasonably estimated. The recognition of a liability is accompanied by a corresponding increase in utility plant. The liability is adjusted for any revisions to the expected value of the retirement obligation (with corresponding adjustments to utility plant) and for accretion due to the passage of time. Certain AMP assets have an indeterminate life, such as hydroelectric facilities, and thus the fair value of the retirement obligation is not reasonably estimable. A liability for these asset retirement obligations will be recorded when a fair value is determinable.

Revenue Recognition and Rates

Revenues are recognized when service is delivered. AMP's rates for capacity and energy billed to members are designed by the AMP board of trustees to recover actual costs. In general, costs are defined to include AMP's costs of purchased power and operations (except for depreciation and amortization) and debt service requirements.

Rates charged to members for nonproject power are based on the actual cost of purchased power. Members also pay a service fee based on kilowatt hours purchased through AMP and retail sales of kilowatt hours in each member electric system.

Programs and others revenues consist of the reimbursement for expenses incurred from programs that AMP offers to its members. Revenue from these programs is recorded as costs are incurred.

Accounts receivable includes \$106,791,435 and \$72,803,260 during the years ended December 31, 2017 and 2016, respectively, for capacity and energy delivered to members that were not billed until the subsequent year.

Project Power Sales Contracts

AMP's member power sales contracts for AMPGS, AFEC, PSEC and the hydro projects are long-term take or pay agreements, which must be paid regardless of delivery, construction completion or power availability.

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

Regulatory Assets and Liabilities

In accordance with the FASB standard for accounting for regulated entities, AMP records regulatory assets (capitalized expenses to be recovered in rates in future periods) and regulatory liabilities (deferred revenues for rates collected for expenses not yet incurred). Regulatory assets include the deferral of depreciation expense, the costs associated with the abandoned AMPGS Project, funds for member rate stabilization plans, unrecognized actuarial losses associated with the pension plan, and other capital expenditures not yet recovered through rates approved by the AMP board of trustees. Regulatory liabilities include revenues collected and intended to fund future capital expenditures, funds for member rate stabilization plans, and other differences between the rates collected from members and expense recognition. As the capital expenditures are depreciated and inventories are used, regulatory assets and liabilities are amortized to match revenues with the related expenditures. Regulatory liabilities or regulatory assets are also recognized for unrealized mark-to-market gains and losses on derivative instruments that are subject to the ratemaking process when realized (Note 6).

Taxes

The IRS ruled that AMP is tax-exempt under Section 501(a) as an organization described in Section 501(c)(12) of the IRC, provided 85% of its total revenue consists of amounts collected from its members for the sole purpose of meeting losses and expenses. As AMP derives its income from the exercise of an essential government function and will accrue to a state or a political subdivision thereof; AMP's income is excludable from gross income under IRC Section 115. For the years ended December 31, 2017 and 2016, AMP complied with this requirement. Accordingly, no provision for federal or state income taxes has been made. AMP is subject to State of Ohio personal property, real estate and sales taxes. AMP has signed agreements with the taxing authorities in West Virginia and Kentucky obligating payment of agreed upon amounts in lieu of real estate taxes.

AMPO, Inc. is a for-profit entity subject to federal, state and local income taxes. Deferred taxes result from temporary differences between the book and tax basis of assets and liabilities. Deferred tax assets are reduced by a valuation allowance if it is more likely than not that some portion or all of the deferred tax asset will not be realized.

Market and Credit Risk

AMP is potentially exposed to market risk associated with commodity prices for electricity and natural gas. AMP manages this risk through the use of long-term power purchase contracts and long-term natural gas supply arrangements.

AMP has credit risk associated with the ability of members to repay amounts due from power sales and other services and of counterparties to long-term power supply arrangements. AMP regularly monitors receivables from its members. AMP does not require collateral with its trade receivables.

AMP has established a risk management function that regularly monitors the credit quality of counterparties to its power purchase arrangements. The risk management function uses multiple sources of information in evaluating credit risk including credit reports, published credit ratings of the counterparty and AMP's historical experience with the counterparty. Credit limits are established depending on the risk evaluation and, when warranted, AMP requires credit protection through letters of credit or other guarantees. The inability of counterparties to deliver power under power supply arrangements could cause the cost of power to members to be in excess of prices in the power supply arrangements.

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

Derivative Instruments

AMP accounts for derivative instruments on its consolidated balance sheets at fair value unless the instruments qualify to be accounted for as normal purchases and normal sales. The fair values of derivative instruments accounted for using mark-to-market accounting are based on exchange prices and broker quotes, when available. If a quoted market price is not available, the estimate of fair value is based on the best information available including valuation models that estimate future energy prices based on existing market and broker quotes and supply and demand market data and other assumptions. The fair values determined are reduced by the appropriate valuation adjustments for items such as discounting, liquidity, credit quality and modeling risk. There is inherent risk in valuation modeling given the complexity and volatility of energy markets. Therefore, it is possible that results in future periods may be materially different as contracts are ultimately settled.

AMP has determined each of its power purchase and power sales contracts which meet the definition of a derivative instrument qualifies to be accounted for as normal purchases and normal sales.

AMP has adopted a fuel procurement and hedging program which contemplates that AMP will, subject to market conditions, undertake to secure, at times when AMP deems such advantageous and prudent, contracts with fuel providers and financial institutions, the effect which will be to hedge, on a rolling 36-month basis, the price of up to 80% of the natural gas volume that AMP projects will be consumed by AFEC operating at its base capacity. AMP has entered into a number of International Swaps and Derivatives Association agreements that are specific to AFEC in managing its natural gas supply requirements. All of these agreements are with investment grade or higher counterparties (Baa3/BBB-). AMP utilizes fixed-for-floating swap contracts to economically hedge the total natural gas fuel expense and records them at fair value. AMP does not utilize derivative financial instruments for speculative purposes, nor does it have trading operations.

The maturities of the swaps highly correlate to forecasted purchases of natural gas, during time frames through December 2027. Under such agreements, AMP pays the counterparty at a fixed rate and receives from the counterparty a floating rate per MMBtu ("decatherm" or "Dth") of natural gas. Only the net differential is actually paid or received. The differential is calculated based on the notional amounts under the agreements. Notional amounts under contracts were \$235,547,465 and \$253,616,100 at December 31, 2017 and 2016, respectively.

On the short term agreements, there was an unrealized loss of \$11,205,579 and \$4,306,719 at December 31, 2017 and 2016, respectively, which is included in other liabilities. On the long-term agreements, there was an unrealized loss of \$56,123,897 and \$60,877,705 at December 31, 2017 and 2016, respectively, which is included in other liabilities. A net gain of \$2,145,052 and \$18,495,218 was recognized in fuel on AMP's consolidated statements of revenues and expenses for the years ending December 31, 2017 and 2016, respectively. Net loss or gain is deferred via regulatory liabilities or assets for recovery in future periods. The losses from the natural gas contracts do not result from other-than-temporary declines in market value.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America ("US GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

Recently Issued Accounting Pronouncements

In 2014, the FASB issued Accounting Standards Update (“ASU”) 606, *Revenue from Contracts with Customers*. The objective of this revenue standard is to provide a single, comprehensive revenue recognition model in which revenue is recognized to reflect the transfer of goods or services to customers at the amount expected to be collected. The new standard requires enhanced disclosures regarding the nature, amount, timing, and uncertainty of revenue and the related cash flows arising from contracts with customers. The new standard is effective for AMP’s reporting periods beginning after December 15, 2017. Management completed the process of analyzing the impact of the new revenue standard which involved identifying material revenue streams and sampling representative contract/ transaction types as well as identifying performance obligations within each material revenue stream. AMP determined that its performance obligations created by its take-or-pay, full or partial requirements contracts to be the commodity and delivery of power. These obligations are satisfied over time and as such, AMP’s revenue from its sales is equivalent to the power supplied and billed each period. Adoption of ASC 606 will not change the current timing of revenue recognition. AMP implemented ASU 606 using the modified retrospective method of adoption. Results for periods prior to adoption will continue to be reported in accordance with historic accounting guidance. Reporting periods beginning after January 1, 2018 will be presented under ASC 606.

In 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)*. This standard is intended to improve financial reporting about leasing transactions. Amongst other changes, the standard will require both operating and capital leases to be recognized on the balance sheet and require incremental disclosures around the amount, timing and uncertainty of cash flows arising from leases. This standard is effective for the Company’s 2019 fiscal year however early adoption of the standard is permitted. Based on the Company’s current leases, the impact of this standard is not expected to have a significant impact on the consolidated financial statements. As events could change this impact, the Company will continue to assess the potential impact of this standard.

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230)*. The new guidance is intended to reduce diversity in practice of how certain transactions are classified in the statement of cash flows. This standard is effective for the Company’s 2018 fiscal year. The impact of adopting this standard is not expected to have a material impact on the consolidated financial statements.

In November 2016, the FASB issued ASU 2016-18, *Statement of Cash Flows (Topic 230)*. The new guidance is intended to reduce diversity that exists in the classification and presentation of changes in restricted cash on the statement of cash flows. This standard is effective for the Company’s 2018 fiscal year. The impact of adopting this standard is not expected to have a material impact on the consolidated financial statements.

American Municipal Power, Inc.
Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

3. Utility Plant

Utility plant cost consists of the following:

	December 2017	December 2016
Land	\$ 45,573,622	\$ 45,578,389
Production Plant	4,383,302,594	3,512,880,573
Station Equipment	41,285,118	41,285,118
Transmission Plant	205,939,080	187,488,436
General Plant	194,663,883	188,909,735
	<u>\$ 4,870,764,297</u>	<u>\$ 3,976,142,251</u>

Depreciation expense for utility plant for the years ended December 31, 2017 and 2016 was \$130,288,733 and \$104,354,165, respectively.

Jointly-Owned Utility Plant

In May 2016, under an ownership agreement with the City of Hamilton, Ohio, AMP acquired a 48.6% undivided ownership in the Greenup Hydroelectric Power Plant ("Greenup"), a 70.2 MW hydroelectric plant located on the Ohio River near Franklin Furnace, Ohio. AMP's ownership interest in Greenup is recorded in accordance with ASC 970-810-45, Undivided Interests. Each owner is obligated to pay its share of the costs of this jointly-owned facility in the same proportion as its ownership interest. Operating costs associated with Greenup are included in AMP's consolidated statements of revenues and expenses and the assets are reflected in AMP's consolidated balance sheets under total utility plant as follows:

	December 31, 2017	December 31, 2016
Greenup		
Utility plant in service	\$ 139,000,000	\$ 139,000,000

AMP 368 has a 23.26% undivided joint ownership interest in PSEC. Kilowatt-hour generation and variable operating expenses are divided on an owner's percentage of dispatched power and fixed operating expenses are allocated by project ownership with each owner reflecting its respective costs in its statements of revenue and expenses. AMP 368's ownership interest in PSEC includes the proportionate share of PSEC's balance sheet as provided for under ASC 970-810-45, Undivided Interests. This Accounting Standard requires the recording of undivided interests in assets and liabilities when given conditions are met.

Information relative to AMP's ownership interest in the PSEC is as follows:

	December 31, 2017	December 31, 2016
Prairie State		
Utility plant in service	\$ 1,156,379,425	\$ 1,145,824,162
Construction work-in-progress	4,451,123	8,145,197

American Municipal Power, Inc.
Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

4. Nonutility Property and Equipment

Nonutility property and equipment cost consists of the following:

	December 2017	December 2016
Land	\$ 1,482,031	\$ 1,482,031
Building	9,532,836	8,566,297
Furniture and equipment	499,373	499,373
Computer software	11,072,341	8,597,361
Vehicles	922,362	1,987,211
	<u>\$ 23,508,943</u>	<u>\$ 21,132,273</u>

Depreciation expense for nonutility property and equipment for the years ended December 31, 2017 and 2016 was \$3,277,162 and \$2,218,035, respectively.

5. Construction Work-in-Progress

Construction work-in-progress consists of the following:

	December 31, 2017	December 31, 2016
Prairie State Energy Campus	\$ 4,451,123	\$ 8,145,197
Hydro Plants	4,894,210	832,050,515
AMP Fremont Energy Center	4,203,905	3,248,631
Information Technology	-	3,870,150
Other	790,005	1,142,719
	<u>\$ 14,339,243</u>	<u>\$ 848,457,212</u>

During the year ended December 31, 2016, \$1,859,482,459 of Hydro Plant assets were placed into service as there were three Hydro Plants that reached commercial operation during the period; Willow Island, Cannelton, and Meldahl. During the year ended December 31, 2017, \$872,470,795 of assets for the Smithland Hydro Plant reached commercial operation and were placed into service.

There was \$0 and \$199,654,076 of capitalized interest included in the construction work-in-progress account at December 31, 2017 and 2016, respectively. AMP capitalized interest costs in the amount of \$23,458,317 and \$48,564,936 for the years ended December 31, 2017 and 2016, respectively.

6. Regulatory Assets and Liabilities

Regulatory assets and liabilities consist of the following:

	December 31, 2017	December 31, 2016
Regulatory assets		
Asset retirement costs	\$ 4,163,788	\$ 3,242,977
Debt service costs (a)	336,157,013	248,483,624
Abandoned construction costs (c)	23,905,151	33,698,059
Projects on behalf of	1,986,365	8,575,875
Operating and maintenance expenditures (b)	60,256,383	37,008,022
Fair value of derivative instruments (d)	67,329,476	65,184,424
Rate stabilization programs	13,226,681	8,708,599
Pension plan and postretirement healthcare plan obligations	10,595,347	11,669,416
Closure of Gorsuch Project costs	13,186,930	13,480,640
Other	4,114,349	-
Total regulatory assets	<u>534,921,483</u>	<u>430,051,636</u>
Current portion	<u>(19,819,750)</u>	<u>(13,253,508)</u>
Noncurrent portion	<u>\$ 515,101,733</u>	<u>\$ 416,798,128</u>
Regulatory liabilities		
Capital improvement expenditures	\$ 932,811	\$ 984,623
Debt service costs (a)	41,451,154	19,360,438
Operating and maintenance expenditures (b)	13,014,441	3,745,609
Working capital expenditures	14,944,588	14,944,588
Rate stabilization programs	23,200,997	19,205,119
Gains on early termination of power purchase contracts	-	756,236
Other	5,014,453	7,080,366
Total regulatory liabilities	<u>98,558,444</u>	<u>66,076,979</u>
Current portion	<u>(1,120,448)</u>	<u>(4,664,527)</u>
Noncurrent portion	<u>\$ 97,437,996</u>	<u>\$ 61,412,452</u>

- a. Debt service costs – Represents over or under recovery of depreciation expenses principally related to power received from generating assets. When the project expenses recorded in the consolidated statements of revenues and expenses exceed the billings, a regulatory asset is created. When the project expenses recorded in the consolidated statements of revenues and expenses are lower than the billings, a regulatory liability is created.
- b. Operating and maintenance expenditures – Represents over (under) collection of operating and maintenance expenditures principally related to power received from the AFEC and PSEC generating assets.
- c. Abandoned construction costs – See Notes 2
- d. Fair value of derivative instruments – See Note 11

7. Restricted Cash

Restricted cash consists of the following:

	December 31, 2017	December 31, 2016
Contractual restrictions	\$ 15,116,816	\$ 11,360,258

Cash from members for contractual restrictions on rate stabilization plans is held in trust for the benefit of the members.

8. Related Parties

AMP has entered into agreements for management and agency services (“Service Agreements”) with the OMEGA Joint Ventures, MESA, and OMEA. Participants in these organizations are all members of AMP. The AMP board of trustees has established a joint venture oversight committee that is responsible for reviewing financial information and operating matters related to the OMEGA Joint Ventures. Under these Service Agreements, AMP serves as agent and provides planning, construction and financial management, operations, and other professional and technical services. AMP is compensated based on an allocation of direct expenses and overhead. Compensation for these services for the years ended December 31, 2017 and 2016 was \$1,153,026 and \$6,287,570, respectively.

MESA provides engineering, administrative and other services to AMP and its members. The expense related to these services for the years ended December 31, 2017 and 2016 was \$13,694,481 and \$18,954,175, respectively.

Certain members of AMP are also members of OMEGA: JV1, JV2, JV4, and JV6. In addition, all of OMEGA JV5 generation is delivered to OMEGA JV5 members. AMP purchases power and fuel on behalf of OMEGA JV5. Power and fuel purchases for the years ended December 31, 2017 and 2016 were \$3,020,382 and \$2,119,609, respectively.

For each of the years ended December 31, 2017 and 2016, AMP made contributions of \$200,000 and \$240,000 to OMEA, respectively.

At December 31, 2017, accounts receivable and accounts payable include \$360,241 and \$895,158, respectively, of amounts due from/to affiliates. At December 31, 2016, accounts receivable and accounts payable include \$3,735,126 and \$3,694,234, respectively, of amounts due from/to affiliates.

TEA provides various power scheduling and commodity management services to AMP as well as purchases natural gas on behalf of AMP. Expenses related to these services were \$85,042,386 for 2017 and \$65,199,534 for 2016, respectively.

American Municipal Power, Inc.

9. Revolving Credit Loan and Term Debt

Revolving Credit Loan

In May 2017, the Facility was extinguished and a new Facility was issued. As of June 30, 2017, AMP has a revolving credit loan facility ("Facility") with a syndicate of nine lenders. The Facility allows AMP to obtain loans with different interest rates and terms and letters of credit. The Facility expires on May 3, 2022, AMP's base borrowing capacity under the Facility is \$600,000,000, with an accordion feature to expand to \$850,000,000. At December 31, 2017, AMP had \$318,400,000 outstanding under the Facility and the effective interest rate was 2.3782%. At December 31, 2016, AMP had \$203,500,000 outstanding under the Facility and the effective interest rate was 1.6875%.

The Facility contains various restrictions including a) proceeds of loans and letters of credit will be used only i) to refinance the existing revolving credit loan, ii) for general working capital purposes and iii) for transitional financing to bond financing and bond anticipation notes; b) AMP is required to give notice of certain ERISA events exceeding \$500,000 in any year or \$1,000,000 for all periods; c) AMP is required to give notice of events causing a material adverse effect on the business, assets or condition of AMP or the rights or benefits of the lenders under the Facility; d) AMP will not incur indebtedness or make guarantees of indebtedness except for indebtedness fully supported by commitments of AMP members and except for i) indebtedness to finance any prepayment for power supply or indebtedness or capital lease obligations for acquisition, construction or improvement of assets up to \$35,000,000 or ii) other unsecured indebtedness up to \$25,000,000; e) AMP will not make loans to i) AMPO, Inc. in excess of \$500,000 or to ii) joint ventures in excess of \$5,000,000; f) cash dividends to members are prohibited; g) annual lease payments may not exceed \$1,000,000 and sale of leaseback transactions are limited to \$5,000,000; h) AMP must maintain financial covenants including i) minimum consolidated tangible net worth and ii) interest coverage ratio in excess of 2.50 to 1.00 measured on a trailing four quarter basis.

Term Debt

AMP has issued term debt in the form of notes payable and bonds for the financing of its own assets and on behalf of specific members. AMP is the primary obligor on term debt issued to finance its assets.

American Municipal Power, Inc.
Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

Bonds and notes payable related to financing AMP assets consists of the following:

	December 31, 2017	December 31, 2016

Build America Bonds and New Clean Renewable Energy Bonds

Certain AMP bonds have been designated as Build America Bonds (“BABs”) and New Clean Renewable Energy Bonds (“New CREBs”) pursuant to the provisions of the American Recovery and Reinvestment Act (the “Recovery Act.”) As of the date of issuance of the bonds designated as BABs, AMP expected to receive a federal cash subsidy in the amount of 35% of the interest payable on or about each interest payment date. As of the date of issuance of the bonds designated as New CREBs, AMP expected to receive a cash subsidy payment from the United States Treasury over the term of the bonds equal to 70% of interest which would have been payable on the designated bonds if the interest on such bonds were determined by reference to the applicable tax credit rate under Section 54A (b)(3) of the Internal Revenue Code. These federal subsidies do not constitute a full faith and credit guarantee of the United States, but are required to be paid by the Treasury under the Recovery Act. AMP is obligated to make all payments of principal and interest on the bonds designated as BABs and New CREBs whether or not it receives the federal subsidy pursuant to the Recovery Act. The federal government mandated budget sequestration that went into effect beginning March 1, 2013, applied to direct credit subsidy payments. The federal subsidy payment to issuers of BABs and New CREBs was reduced by 6.9% and 6.8% in fiscal years 2017 and 2016, respectively. AMP has been notified by the IRS that the subsidy will be reduced by 6.6% in 2018. The reductions in subsidies related to the sequestration have been extended through 2024.

PSEC 2008A Bonds

The Prairie State Energy Campus Project Revenue Bonds, Series 2008A (“PSEC 2008A Bonds”) were issued on July 2, 2008, pursuant to the terms of the PSEC MTI, dated as of November 1, 2007, as amended and supplemented, with an aggregate par amount of \$760,655,000. The PSEC 2008A Bonds were issued at an aggregate discount of \$10,839,397. Interest is payable semiannually, beginning February 15, 2009.

On January 14, 2015, AMP issued, pursuant to the PSEC MTI, its Prairie State Energy Campus Project Revenue Bonds, consisting of three series: \$507,875,000 Refunding Series 2015A (“PSEC 2015A Bonds”), \$135,350,000 Refunding Series 2015B (“PSEC 2015B Bonds”) and \$95,100,000 Refunding Series 2015C (“PSEC 2015C Bonds” and, together with PSEC 2015A Bonds and PSEC 2015B Bonds, “PSEC 2015 Bonds”). The PSEC 2015 Bonds were issued at an aggregate premium of \$85,874,257. The PSEC 2015 Bonds were issued to (i) refund a portion of AMP’s PSEC 2008A Bonds, (ii) refund a portion of AMP’s Prairie State Energy Campus Revenue Bonds, Series 2009A (“PSEC 2009A Bonds”), issued on March 31, 2009 in the aggregate principal amount of \$166,565,000, (collectively “PSEC Escrow Bonds”), and (iii) pay the costs of issuance of the PSEC 2015 Bonds. Specifically, a portion of the proceeds of the PSEC 2015 Bonds and other available funds under the Indenture, were deposited in an Escrow Fund established by AMP to be used exclusively to advance refund portions of PSEC 2008A Bonds and PSEC 2009A Bonds. In the consolidated balance sheets, the funds held in escrow are presented in Trustee funds – restricted.

On November 30, 2017, AMP issued, pursuant to the PSEC MTI, its Prairie State Energy Campus Project 2017A Revenue Bonds for \$65,850,000. The PSEC 2017A Bonds were issued to (i) refund a portion (\$72,090,000) of AMP’s Prairie State Energy Campus Project Revenue Bonds, Series 2008A (the “PSEC 2008A Bonds”), issued on July 2, 2008 in the aggregate principal amount of \$760,655,000, (ii) refund a portion (\$4,010,000) of AMP’s Prairie State Energy Campus Revenue Bonds, Series 2009A (the “PSEC 2009A Bonds”), issued on March 31, 2009 in the aggregate principal amount of \$166,565,000, and (iii) pay the costs of issuance of the PSEC 2017A Bonds. Specifically, a portion of the proceeds of the PSEC 2017A Bond and other available funds under the Indenture, were deposited in an Escrow Fund established by AMP

American Municipal Power, Inc.

to be used exclusively to advance refund portions of PSEC 2008A Bonds and PSEC 2009A Bonds. In the consolidated balance sheets, the funds held in escrow are presented in Trustee funds – restricted.

The maturities of the PSEC 2008A Bonds at December 31, 2017 are as follows:

Maturity Date - February 15	Principal Amount	Interest Rate
2018	\$ 3,915,000	4.500 - 5.000 %
	<u>\$ 3,915,000</u>	

PSEC 2009A Bonds

The PSEC 2009A Bonds were issued on March 31, 2009, pursuant to the PSEC MTI, in the form of serial and term bonds with an aggregate par amount of \$166,565,000. The PSEC 2009A Bonds were issued with an aggregate discount of \$2,750,794. The PSEC 2009A Bonds mature between 2017 and 2039 and bear interest at fixed rates between 4.00% and 5.75%. Interest is payable semiannually, beginning August 15, 2009. Assured Guaranty Corp. issued a municipal bond insurance policy to insure the payment of the principal and interest on the PSEC 2009A Bonds.

See PSEC2008A Bonds for details on refunding of a portion of PSEC 2009A Bonds.

The PSEC 2009A Bonds outstanding at December 31, 2017 are as follows:

Maturity Date - February 15	Principal Amount	Interest Rate
2018	\$ 8,455,000	4.125 %
2019	11,835,000	4.250 %
	<u>\$ 20,290,000</u>	

PSEC 2009B Bonds

The Prairie State Energy Campus Project Revenue Bonds, Series 2009B (“PSEC 2009B Bonds”) were issued on October 15, 2009, pursuant to the PSEC MTI, in the form of serial and term bonds with an aggregate par amount of \$83,745,000. Interest is payable semiannually, beginning February 15, 2010. AMP has the right to redeem the PSEC 2009B Bonds on any date, in whole or in part, at the make-whole premium.

The PSEC 2009B Bonds outstanding at December 31, 2017 are as follows:

Maturity Date - February 15	Principal Amount	Interest Rate
2018	\$ 2,470,000	4.955 %
2019	2,635,000	5.055 %
2024	16,300,000	5.355 %
2028	16,650,000	5.803 %
	<u>\$ 38,055,000</u>

Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

The PSEC 2009B Bonds due on February 15, 2024 and February 15, 2028, are term bonds subject to mandatory sinking fund redemption on February 15 in the following years in the following principal amounts at a redemption price equal to par, together with interest accrued to the date of redemption:

The PSEC 2009B Bonds, maturing on February 15, 2024:

Year	Principal Amount
2020	\$ 2,845,000
2021	3,055,000
2022	3,260,000
2023	3,455,000
2024	3,685,000
	<u>\$ 16,300,000</u>

The PSEC 2009B Bonds, maturing on February 15, 2028:

Year	Principal Amount
2025	\$ 3,955,000
2026	4,245,000
2027	4,550,000
2028	3,900,000
	<u>\$ 16,650,000</u>

PSEC 2009C Bonds

The Prairie State Energy Campus Project Revenue Bonds, Series 2009C (“PSEC 2009C Bonds”) were issued on October 15, 2009, pursuant to the PSEC MTI, in the form of serial and term bonds with an aggregate par amount of \$385,835,000. The PSEC 2009C Bonds mature between 2034 and 2043 and bear interest at fixed rates between 5.953% and 6.553%. Interest is payable semiannually, beginning February 15, 2010.

AMP designated the PSEC 2009C Bonds as BABs. See “Build America Bonds and New Clean Renewable Energy Bonds” above.

The PSEC 2009C Bonds outstanding at December 31, 2017 are as follows:

Maturity Date - February 15	Principal Amount	Interest Rate
2034	\$ 10,000,000	5.953 %
2034	25,885,000	6.453 %
2039	77,435,000	6.553 %
2043	272,515,000	6.053 %
	<u>\$ 385,835,000</u>	

American Municipal Power, Inc.
Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

From any available moneys, AMP may, at its option, redeem, prior to their respective maturities, in whole or in part, the PSEC 2009C Bonds stated to mature on (i) February 15, 2034 and bearing interest at 6.453%, and (ii) February 15, 2039, on any date beginning February 15, 2020, at the redemption price of par, together with interest accrued to the date fixed for redemption. In addition, AMP has the right to redeem any or all of the PSEC 2009C Bonds on any date, in whole or in part, at the make-whole premium. The PSEC 2009C Bonds are subject to redemption from any available funds, at the option of AMP, prior to their maturity, in whole or in part upon the occurrence of certain extraordinary events, at a make-whole redemption price.

The PSEC 2009C Bonds due on February 15, 2034, February 15, 2039 and February 15, 2043, are term bonds subject to mandatory sinking fund redemption on the principal payment date in the following years in the following principal amounts at a redemption price equal to par, together with interest accrued to the date of redemption:

The PSEC 2009C Bonds bearing interest at 5.953% and maturing on February 15, 2034:

Year	Principal Amount
2028	\$ 950,000
2029	1,330,000
2030	1,395,000

funds at the option of AMP, prior to their maturity, in whole or in part, upon the occurrence of certain extraordinary events, at a make-whole redemption price.

The PSEC includes adjacent coal reserves and all associated mine, rail, water, coal combustion waste storage and ancillary support. The generating station consists of two supercritical units with a nominal net output capacity of 800MW each. The plant incorporates state-of-the-art emissions control technology consistent with other plants that have been successfully permitted. All permits required for the construction of the power plant have been issued. PSEC Unit 1 was declared to be in commercial operation in June 2012 and PSEC Unit 2 was declared to be in commercial operation in November 2012. AMP entered into a power sales contract dated November 1, 2007 with 68 of its members (the "PSEC Participants") for its share of the electric output of the PSEC (the "AMP Entitlement"). The PSEC Participants' obligations to make payments pursuant to the power sales contract are limited obligations payable solely out of the revenues, and, with two exceptions, as an operating expense, of their respective electric systems. Each PSEC Participant's obligation to make payments pursuant to the power sales contract is a take-or-pay obligation. Therefore, such payments shall not be subject to any reduction, whether by offset, counterclaim, or otherwise; and such payments shall be made whether or not either unit of PSEC or any other power sales contract resource is completed, operable, operating and notwithstanding the suspension, interruption, interference, reduction or curtailment, in whole or in part, for any reason whatsoever, of the AMP Entitlement or the PSEC Participants' power sales contract resources share, including step-up power. The power sales contract contains a step-up provision that requires, in the event of default by an PSEC Participant, the nondefaulting PSEC Participants to purchase a pro rata share, based upon each nondefaulting PSEC Participant's original power sales contract resources share which, together with the shares of the other nondefaulting PSEC Participants, is equal to the defaulting PSEC Participant's power sales resources share. No nondefaulting participant is obligated to accept step-up power in excess of 25% of its original power sales contract resources share.

The proceeds of the PSEC 2008A Bonds, the PSEC 2009A Bonds, the PSEC 2009B Bonds, the PSEC 2009C Bonds and the PSEC 2010 Bonds were used to fund the cost of construction of the PSEC.

PSEC 2015A Bonds

The PSEC 2015A Bonds will mature between 2020 and 2043 and will bear interest rates at fixed rates between 4.00% and 5.25%. Interest is payable semiannually, beginning August 15, 2015.

American Municipal Power, Inc.

2042	29,435,000
2043	30,695,000
2044	32,005,000
	<u>\$ 308,370,000</u>

Hydro 2009C Bonds

The Hydro 2009C Bonds outstanding at December 31, 2017 are as follows:

Maturity Date - February 15	Principal Amount	Interest Rate
2018	\$ 25,850,000	5.250 %
2019	27,250,000	5.250 %
2020	21,610,000	5.000 %
	<u>\$ 74,710,000</u>	

From any available moneys, AMP may, at its option, redeem prior to their respective maturities, in whole or in part, the Hydro 2009C Bonds stated to mature after February 15, 2020 on any date beginning February 15, 2020, at a redemption price of par, together with interest accrued to the date fixed for redemption.

On October 6, 2016, AMP issued, pursuant to the Hydro MTI, its Combined Hydroelectric Project Revenue Bonds, Series 2016A, ("Hydro 2016A Bonds") with an aggregate par amount of \$209,530,000. The Hydro 2016A Bonds were issued at an aggregate premium of \$34,152,726. The Hydro 2016A Bonds were issued to in order to (i) finance construction of the Combined

American Municipal Power, Inc.
Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

Hydroelectric Projects, (ii) repay draws on the line of credit used as interim financing, (iii) fund a Parity Common Reserve Account, (iv) refund a portion of the Hydro 2009C Bonds (“Hydro Escrow Bonds”), and (v) pay the cost of issuance. Specifically, a portion of the proceeds of the Hydro 2016A Bonds were deposited in an Escrow Fund established by AMP to be used exclusively to advance refund portions of Hydro 2009C Bonds. In the consolidated balance sheets, the funds held in escrow are presented in Trustee funds – restricted.

Hydro 2009D Bonds

The Combined Hydroelectric Project Revenue Bonds, Series 2009D (“Hydro 2009D Bonds”) were issued on December 2, 2009, pursuant to the Hydro MTI, as clean renewable energy bonds, pursuant to the Energy Tax Incentive Act of 2005, at a par amount of \$22,600,000. The Hydro 2009D Bonds were issued at a discount of \$3,000,000 and do not bear interest. AMP is required to make annual debt service payments on the Hydro 2009D Bonds in the amount of \$1,329,412 on December 15 of each year, beginning in 2009 and ending in 2025. The Hydro 2009D Bonds are subject to redemption in whole or in part in the case of certain extraordinary events.

Hydro 2010A, 2010B and 2010C Bonds

The Combined Hydroelectric Projects Revenue Bonds, Series 2010A, 2010B and 2010C (“Hydro 2010A Bonds”, “Hydro 2010B Bonds” and “Hydro 2010C Bonds”, collectively “Hydro 2010 Bonds”) were issued on December 21, 2010, pursuant to the Hydro MTI, with an aggregate par amount of \$1,378,990,000. Interest is payable semiannually, beginning February 15, 2011.

AMP designated the Hydro 2010B Bonds as BABs and the Hydro 2010C Bonds as New CREBs. See “Build America Bonds and New Clean Renewable Energy Bonds” above.

Hydro 2010A Bonds

The Hydro 2010A Bonds outstanding at December 31, 2017 are as follows:

Maturity Date - February 15	Principal Amount	Interest Rate
2020	\$ 2,365,000	6.123 %
2021*	8,060,000	6.223 %

The Meldahl 2016A Bonds due February 15, 2041 and February 15, 2046 are term bonds subject to mandatory sinking fund redemption on the principal payment date in the following years in the following principal amounts as a redemption price equal to par, together with interest accrued to the date of redemption.

American Municipal Power, Inc.
Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

Meldahl 2016A Bonds bearing interest at 4.000% and maturing on February 15, 2041:

Year	Principal Amount
2037	\$ 3,580,000
2038	3,610,000
2039	3,645,000
2040	3,680,000
2041	3,710,000
	<u>\$ 18,225,000</u>

Meldahl 2016A Bonds bearing interest at 5.000% and maturing on February 15, 2046:

Year	Principal Amount
2042	\$ 3,750,000
2043	3,815,000
2044	3,870,000
2045	3,925,000
2046	3,980,000
	<u>\$ 19,340,000</u>

The proceeds of the Meldahl 2016A funds were used to (i) repay draws on the line of credit used as interim financing, (ii) fund a parity common reserve account, and (iii) pay the cost of issuance.

AMP has entered into a power sales contract dated as of March 1, 2009 with 48 of its members (the "Meldahl Participants") by the terms of which AMP agrees to sell, and the Meldahl Participants agree to buy on a take-or-pay basis, the electric output of a hydroelectric facility with an aggregate capacity of 105 MW on the Ohio River. The take-or-pay obligations of the Meldahl Participants under the Meldahl power sales contract are limited obligations payable solely out of the revenues, and, with two exceptions, as an operating expense, of their respective electric systems and are subject to step up to the same extent as the obligations of the PSEC Participants under the PSEC power sales contract, except that the maximum step-up percentage is 106%.

AMP Fremont Energy Center 2012B Bonds

The AMP Fremont Energy Center Revenue Bonds, Series 2012B (the “AFEC 2012B Bonds”) were issued June 29, 2012, pursuant to a Master Trust Indenture, dated as of June 1, 2012, as supplemented (“AFEC MTI”), in the form of serial and term bonds with an aggregate par amount of \$525,545,000. Interest is payable semiannually beginning February 15, 2013. AMP has the right to redeem the AFEC 2012B Bonds maturing after February 15, 2022, prior to their respective maturities, in whole or in part, on any date beginning February 15, 2022, at a redemption price of par, plus accrued interest.

On December 20, 2017, AMP issued, pursuant to the AFEC MTI, its AMP Fremont Energy Campus Project Revenue Bonds, Refunding Series 2017A, (“AFEC 2017A Bonds”) with an aggregate par amount of \$124,385,000. The AFEC 2017A Bonds were issued in order to (i) refund a portion (\$127,630,000) of the AMP’s Fremont Energy Campus Project Bonds, Series 2012B (“the AFEC 2012B Bonds”), issued on June 29, 2012 in the aggregate principal amount of \$525,545,000, and (ii) pay the costs of issuance of the AFEC 2017A Bonds. Specifically, a portion of the proceeds of the AFEC 2017A Bonds were deposited in an Escrow Fund established by AMP to be used exclusively to advance refund portions of AFEC 2012B Bonds. In the consolidated balance sheets, the funds held in escrow are presented in Trustee funds – restricted

The AFEC 2012B Bonds outstanding at December 31, 2017 were as follows:

Maturity Date - February 15	Principal Amount	Interest Rate
2018	9,360,000	5.000 %
2019	9,825,000	5.000 %

	<u>\$ 125,630,000</u>	

The Greenup 2016A Bonds due on February 15, 2041 and February 15, 2046 are term bonds subject to mandatory sinking fund redemption on the principal payment date in the following years in the following principal amounts at a redemption price equal to par, together with interest accrued to the date of redemption.

Greenup 2016A Bonds bearing interest at 5.000% and maturing on February 15, 2041:

Year	Principal Amount
2037	\$ 5,325,000
2038	5,590,000
2039	5,870,000
2040	6,165,000
2041	6,470,000
	<u>\$ 29,420,000</u>

American Municipal Power, Inc.
Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

Greenup 2016A Bonds bearing interest at 5.000% and maturing on February 15, 2046:

Year	Principal Amount
2042	\$ 6,795,000
2043	7,135,000
2044	7,490,000
2045	7,865,000
2046	8,260,000
	<hr/>
	\$ 37,545,000

The proceeds of the Greenup 2016A Bonds were used to (i) finance the purchase price of the 48.6% undivided ownership interest in the Greenup Hydroelectric facility (see Note 3), (ii) provide funds for capital construction, (iii) repay draws on the line of credit used as interim financing, (iv) fund a portion of interest due on the Greenup 2016A Bonds, and (v) pay the cost of issuance.

Project Notes

The AMP project notes matured in October 2017 with interest at 2.00% payable at maturity. The municipal project notes are payable solely from revenues received by AMP pursuant to its agreements with municipal members for construction of various electric utility projects. There is no recourse to AMP regarding these notes, other than from such revenues.

Term Debt on Behalf of Others

Central Virginia Electric Cooperative

AMP and CVEC entered into a power sales contract dated July 26, 2011 under which AMP sells and CVEC purchases on a take-or-pay basis, the output associated with the "4.15% Interest". On June 26, 2012, to finance the cost of the 4.15% Interest, AMP obtained from the National Cooperative Services Corporation, an affiliate of the Rural Utilities Cooperative Financial Corporation (commonly known as "CFC"), a \$25,000,000 term loan to be amortized over 30 years.

This loan is secured by the CVEC power sales contract, a mortgage on and security interest in the 4.15% Interest and a CVEC payment guaranty. AMP's obligations for the term loan are nonrecourse to AMP except to the extent of AMP's rights under the CVEC power sales contract and the mortgage on and the security interest in the 4.15% Interest.

The term loan has fixed interest rates ranging from 2.75% to 5.60% through the life of the loan and the term loan matures on February 15, 2042.

As of December 31, 2017 and 2016, \$21,062,499 and \$21,916,666 remained as outstanding principal, respectively.

Term Debt on Behalf of Members (Nonrecourse)

The individual municipality is the primary obligor on term debt issued on its behalf. "On behalf of" financings are nonrecourse to AMP and are presented in the consolidated balance sheets with a corresponding receivable from the project or member to which the on-behalf-of financing relates.

American Municipal Power, Inc.
Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

Bonds and notes payable issued by AMP on behalf of member communities consist of the following at December 31:

	2017	2016
Municipal project notes, due on various dates through December 2017 with interest from 2.00% to 2.25% at December 31, 2017 and 2016	<u>\$ 16,923,872</u>	<u>\$ 18,503,500</u>
	16,923,872	18,503,500
Current portion	<u>(16,923,872)</u>	<u>(18,503,500)</u>
Noncurrent portion	<u>\$ -</u>	<u>\$ -</u>

At December 31, 2017 and 2016, no accrued interest was recorded in the consolidated balance sheets that related to nonrecourse notes payable issued on-behalf-of members. Interest expense related to nonrecourse term debt issued on behalf of members was \$103,862 and \$22,164 for the years ended December 31, 2017 and 2016, respectively.

The following is a summary of financing receivables from members related to on-behalf-of debt at December 31:

	2017	2016
Financing receivable - MEGA JV2 members	\$ 188,606	\$ 4,142,633
Financing receivable - Wadsworth	2,470,429	3,094,429
Financing receivable - Genoa	-	2,873,533
Notes receivable - members	23,290,059	21,212,964
Interest receivable	<u>251,687</u>	<u>63,612</u>
	26,200,781	31,387,171
Current portion	<u>(22,186,743)</u>	<u>(26,337,558)</u>
Noncurrent portion	<u>\$ 4,014,038</u>	<u>\$ 5,049,613</u>

Interest income related to financing receivables from members was \$251,687 and \$63,612 for the years ended December 31, 2017 and 2016, respectively. Interest income from financing receivables and interest expense on term debt issued on behalf of members are classified in program and other revenue.

PSEC Bonds

The PSEC MTI contains a provision, among others, that AMP will at all times fix, charge and collect rates and charges for the use of, and for the services and facilities furnished by, the PSEC. These rates and charges are to provide net revenues at least 110% of the net annual debt service requirements of the PSEC Bonds.

As supplemented by supplemental trust agreements executed in connection with each series of the PSEC Bonds, the trust agreement also provides for the creation with the trustee of the following subfunds and accounts for each such series of PSEC Bonds: (a) Acquisition and Construction Subfund (containing amounts to be paid for costs incurred by AMP in connection with the construction of the PSEC); (b) Cost of Issuance Account (containing amounts to be paid for costs incurred by AMP in connection with the issuance of the PSEC Bonds); (c) Bond Subfund (consisting of the Capitalized Interest Subaccount, the Interest Subaccount, the Principal Subaccount, the Sinking Subaccount, the Redemption Subaccount, and the Parity Common Reserve Account; (d) Subordinate Obligations Subfund; and (e) Reserve and Contingency Subfund (consisting of the Overhaul Account, the Renewal and Replacement Account, the Capital Improvement Account, the Rate Stabilization Account, the Environmental Improvement Account and the Self -Insurance Account).

Certain of the supplemental trust indentures also create Tracking Interest Subaccounts for the series of BABs and tax-exempt bonds to hold capitalized funds to pay interest on such bonds subsequent to the commercial operation dates of the project units.

Hydro Bonds

The Hydro MTI contains a provision that AMP will at all times fix, charge and collect rates and charges for the use of, and for the services and facilities furnished by, the Hydro plants. These rates and charges should provide net revenues at least 110% of the net annual debt service requirements of the Hydro Bonds.

As supplemented by supplemental trust agreements executed in connection with each series of the Hydro Bonds, the trust agreement also provides for the creation with the trustee of the following subfunds and accounts for each such series of Hydro Bonds: (a) Acquisition and Construction Account (containing amounts to be paid for costs incurred by AMP in construction of the Hydro plants); (b) Cost of Issuance Account (containing amounts to be paid for costs incurred by AMP in connection with the issuance of the series of Hydro Bonds); (c) Bond Subfund (consisting of the Capitalized Interest Subaccount, the Interest Subaccount, the Derivatives Payments Subaccount, the Principal Subaccount, the Sinking Subaccount, the Redemption Subaccount and the Parity Common Reserve Account; (d) Subordinate Obligations Subfund; and (e) Reserve and Contingency Subfund (consisting of the Overhaul Account, the Renewal and Replacement Account, the Capital Improvement Account, the Rate Stabilization Account, the Environmental Improvement Account and the Self-Insurance Account).

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

Certain of the supplemental trust agreements also create (i) Tracking Interest Subaccounts for the series of BABs, New CREBs and tax-exempt bonds to hold capitalized funds to pay interest on such bonds subsequent to the commercial operation dates of the project units and (ii) Special Reserve Accounts to hold amounts pledged particular series of BABs and New CREBs.

Meldahl Bonds

The Meldahl MTI contains a provision that AMP will at all times fix, change and collect rates and charges for the use of, and for the services and facilities furnished by, the Meldahl Hydro plant. These rates and charges should provide net revenues at least equal to 110% of the net annual debt service requirements of the Meldahl Bonds.

As supplemented by supplemental trust agreements executed in connection with each series of the Meldahl Bonds, the trust agreement also provides for the creation with the trustee of the following subfunds and accounts for each such series of Meldahl Bonds: (a) Acquisition and Construction Account (containing amounts to be paid for costs incurred by AMP in construction of the Meldahl Hydro plant); (b) Cost of Issuance Account (containing amounts to be paid for costs incurred by AMP in connection with the issuance of the Meldahl Bonds); (c) Bond Subfund (consisting of the Capitalized Interest Subaccount, the Interest Subaccount, the Derivatives Payments Subaccount, the Principal Subaccount, the Sinking Subaccount, the Redemption Subaccount and the Parity Common Reserve Account (containing amounts to be paid for debt service and amounts to be paid should a redemption be triggered); (d) Subordinate Obligations Subfund; and (e) Reserve and Contingency Subfund (consisting of the Overhaul Account, the Renewal and Replacement Account, the Capital Improvement Account, the Rate Stabilization Account, the Environmental Improvement Account and the Self-Insurance Account).

Certain of the supplemental trust agreements also create (i) Tracking Interest Subaccounts for the series of BABs, New CREBs and tax-exempt bonds to hold capitalized funds to pay interest on such bonds subsequent to the commercial operation date of the project units and (ii) Special Reserve Accounts to hold amounts pledged to particular series of BABs and New CREBs.

AFEC Bonds

The AFEC MTI contains a provision that AMP will at all times fix, change and collect rates and charges for the use of, and for the services and facilities furnished by, the AFEC plant. These rates and charges should provide net revenues equal to at least 110% of the net annual debt service requirements of the AFEC Bonds.

As supplemented by the first and second supplemental trust indentures executed in connection with the two series of the AFEC Bonds, and a third supplemental trust agreement that secures AMP's fuel hedge agreement counterparties, the trust agreement also provides for the creation with the trustee of the following subfunds and accounts for each such series of AFEC Bonds: (a) Acquisition and Construction Account (containing amounts to be paid for costs incurred by AMP in construction of the AFEC plant); (b) Cost of Issuance Account (containing amounts to be paid for costs incurred by AMP in connection with the issuance of the series of AFEC Bonds); (c) Revenue Subfund (consisting of the Operating Subaccount, the Fuel Reserve Subaccount, the Working Capital Subaccount, the Derivative Receipt Subaccount, and the General Subaccount and the Fuel Hedge Subaccount to be held by the trustee); (d) Bond Subfund (consisting of the Capitalized Interest Subaccount, the Interest Subaccount, the Derivatives Payment Subaccount, the Principal Subaccount, the Sinking Subaccount, the Redemption Subaccount, and the Parity Common Reserve Account; containing amounts to be paid for debt service and amounts to be paid should a redemption be triggered); (e) Subordinate Obligations Subfund; (f) Reserve and Contingency Subfund (consisting of the Overhaul Account, the Renewal and Replacement Account, the Capital Improvement Account, the Environmental Improvement Account, the Rate Stabilization Account, the Self-Insurance Account and with the trustee the Fuel Hedge Reserve Account).

American Municipal Power, Inc.

11. Fair Value of Financial Instruments

As defined in the fair value measurements standard, fair value is the price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between willing market participants on the measurement date. This standard establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted market prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

The three levels of the fair value hierarchy defined by the fair value measurement standard are as follows:

- Level 1 Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those where transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. AMP's Level 1 assets primarily consist of money market funds which are included in trustee funds on the consolidated balance sheets. AMP does not have any liabilities that meet the definition of Level 1.
- Level 2 Pricing inputs are either directly or indirectly observable in the market as of the reporting date, other than quoted prices in active markets included in Level 1. Level 2 includes those financial instruments that are valued using models or other valuation methodologies based on assumptions that are observable in the marketplace throughout the full term of the instrument, can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace. These models are primarily industry-standard models that consider various assumptions, including quoted forward prices for commodities, time value, volatility factors, and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Liabilities in this category include natural gas swaps.
- Level 3 Pricing inputs include inputs that are generally less observable from objective sources. These inputs may be used with internally developed methodologies that result in management's best estimate of fair value. AMP does not have any assets or liabilities that met the definition of Level 3.

AMP utilizes market data and assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable. AMP primarily applies the market approach for recurring fair value measurements using the best information available. Accordingly, AMP maximizes the use of observable inputs and minimizes the use of unobservable inputs.

American Municipal Power, Inc.
Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

The following table presents the carrying amounts and fair values of financial instruments not recognized at fair value in the consolidated balance sheets:

Financial Instruments	December 31, 2017		December 31, 2016	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Assets				
Debt securities held in trustee funds, restricted and non-restricted	\$ 1,331,131,007	\$ 1,351,434,625	\$ 1,147,497,269	\$ 1,169,455,104
Liabilities				
Fixed rate term debt, including current maturities, AMP	6,076,124,422	7,478,694,517	5,948,414,759	6,978,099,226
Fixed rate term debt, including current maturities, on behalf of others	37,986,371	37,986,371	40,420,166	40,420,166
Variable rate term debt, including current maturities, AMP	95,100,000	95,100,000	95,100,000	95,100,000

The carrying amounts of cash, accounts receivable, accounts payable, the AMP project note, the municipal project notes, and the revolving credit loan approximate their fair value due to their short maturities. The fair value of trustee funds is determined based on market observable inputs that include, but are not limited to, benchmark yields, reportable trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, and offers. The fair value of debt securities included trustee funds is within Level 2 of the fair value hierarchy. The fair value of long-term debt reflects the present value of cash outflows relating to those obligations based on the current call price or the yield to maturity as deemed appropriate at the end of each respective year. The yields assumed were based on municipal bond ratings offered by organizations similar to AMP. The fair value of long-term debt is within Level 2 of the fair value hierarchy.

The estimated fair values of the natural gas swaps were determined using New York Mercantile Exchange ("NYMEX") futures settlement prices for delivery of natural gas at Henry Hub adjusted by the price of NYMEX ClearPort basis swaps, which reflect the difference between the price of natural gas at a given delivery basin and the Henry Hub pricing points.

American Municipal Power, Inc.
Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

The following tables set forth AMP's financial assets and financial liabilities that are accounted for on a recurring basis at fair value by level within the fair value hierarchy as of December 31, 2017 and December 31, 2016. As required by the fair value measurement standard, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. AMP's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels.

	December 31, 2017			
	Level 1	Level 2	Level 3	Total
Assets				
Money market funds	\$ 189,824,262	\$ -	\$ -	\$ 189,824,262
	<u>\$ 189,824,262</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 189,824,262</u>
Liabilities				
Natural gas swaps	\$ -	\$ 67,329,476	\$ -	\$ 67,329,476
	<u>\$ -</u>	<u>\$ 67,329,476</u>	<u>\$ -</u>	<u>\$ 67,329,476</u>
	December 31, 2016			
	Level 1	Level 2	Level 3	Total
Assets				
Money market funds	\$ 226,532,344	\$ -	\$ -	\$ 226,532,344
	<u>\$ 226,532,344</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 226,532,344</u>
Liabilities				
Natural gas swaps	\$ -	\$ 65,184,424	\$ -	\$ 65,184,424
	<u>\$ -</u>	<u>\$ 65,184,424</u>	<u>\$ -</u>	<u>\$ 65,184,424</u>

The determination of the above fair value measures takes into consideration various factors required under the fair value measurement standard. These factors include nonperformance risk, including counterparty credit risk and the impact of credit enhancements (such as cash deposits, line of credit and priority interests). The impact of nonperformance risk was immaterial in the fair value measurements.

Notes to Consolidated Financial Statements
Years Ended December 31, 2017 and 2016

12. Asset Retirement Obligations

Asset retirement obligations consist of the following:

	2017	2016
Asset retirement obligation, beginning of year	\$ 7,772,557	\$ 7,696,014
Accretion	1,004,321	357,146
Liabilities settled	<u>(571,421)</u>	<u>(280,603)</u>
Asset retirement obligation, end of year	<u>\$ 8,205,457</u>	<u>\$ 7,772,557</u>

13. Employee Benefits

Pension Plan

AMP had a defined benefit pension plan (the "Pension Plan") which covered substantially all former hourly employees of Gorsuch. Due to the closure of the Gorsuch plant in 2010, there were no active plan participants as of December 31, 2015. Benefits for eligible employees are based primarily on years of service and compensation rates. In November 2015, AMP received a favorable determination for termination of the American Municipal Power, Inc. Defined Benefit Pension Plan under section 401(a) and 501(a) of the Internal Revenue Code of 1986. In January 2016, AMP executed a non-participating single premium group annuity contract sales agreement with a third party life insurance company and the pension liability was transferred for \$12,777,695.

Effective December 1, 2013, AMP adopted a qualified, defined contribution retirement plan under code section 414(h)(2), commonly referred to as a Money Purchase Pension Plan. AMP employees hired after December 1, 2013 are enrolled in this Money Purchase Pension Plan.

The following table sets forth the benefit obligation, change in plan assets, and funded status for the Pension Plan at December 31, 2016:

	2016
Change in benefit obligation	
Benefit obligation at beginning of year	\$ 12,777,695
Benefits paid	<u>(12,777,695)</u>
Benefit obligation at end of year	<u>-</u>
Change in plan assets	
Fair value of plan assets at beginning of year	9,268,047
Benefits paid	<u>(9,268,047)</u>
Fair value of plan assets at end of year	<u>-</u>
Funded status	<u>\$ -</u>

14. Commitments and Contingencies

Environmental Matters

AMP is subject to regulation by federal and state authorities with respect to air and water quality control and other environmental matters, and is subject to zoning and other regulations by local authorities. All referenced legislative and regulatory comment filings can be found on AMP's website. AMP is considering, or has considered, compliance with the following environmental laws:

Former President Obama's Climate Action Plan

Announced on June 25, 2013, the President's Climate Action Plan consists of a timetable and several components governing the United States Environmental Protection Agency's ("USEPA's") efforts to reduce carbon dioxide ("CO₂") and other greenhouse gases ("GHGs").

USEPA first proposed Carbon Pollution Standards for fossil-fueled power plants through the New Source Performance Standards ("NSPS") in Section 111(b) of the Clean Air Act ("CAA") on January 8, 2014. While AMP has no units that would be impacted by the "new" unit NSPS for GHGs, the Agency's decision was expected to have possible implications for the agency's existing source rule (see below), so AMP filed comments on May 9, 2014. The agency also proposed NSPS to reduce CO₂ emissions from modified and reconstructed fossil-fueled power plants on June 18, 2014, to which AMP submitted comments on December 1, 2014. Rules finalizing the NSPS for both types of fossil-fueled power plants under Section 111(b) NSPS authority were published in the Federal Register on October 23, 2015.

USEPA also published the Clean Power Plan (CPP) on October 23, 2015, which was designed to limit CO₂ emissions from existing fossil fuel units pursuant to NSPS Section 111(d) authority. On February 9, 2016, the U.S. Supreme Court stayed implementation of the Plan pending judicial review by the D.C. Circuit Court of Appeals and potential appeal to the U.S. Supreme Court. On September 27, 2016, the D.C. Circuit Court of Appeals heard oral arguments *en banc* and a decision was expected in spring of 2017 followed by an expected appeal to the U.S. Supreme Court.

While the Plan would have created compliance obligations for PSGC and AFEC, AMP's renewable resources and energy efficiency programs were expected to provide beneficial credits for project participants. In 2014, 2015 and 2016 AMP officials met with USEPA and state agency officials to discuss AMP's key areas of interest impacted by the rule. The final rule included language supported by AMP that clarified the eligibility of AMP's new hydroelectric projects to be used for compliance credit.

The election of President Donald Trump heralded a different regulatory approach to GHG emissions. One of President Trump's first Executive Orders abandoned the former administration's Climate Action Plan. New USEPA Administrator Scott Pruitt has stated that the CPP is beyond the legal authority Congress granted to the USEPA through the Clean Air Act.

On Apr. 3, 2017, USEPA announced the withdrawal of proposed CPP rules designed to establish federal plan requirements, creating model trading rules, and Clean Energy Incentive Program design details, all needed to implement the CPP. The proposed CPP repeal was published in the Federal Register on October 16, 2017, with a deadline for comments of December 15, which has now been extended until April 16. This proposal establishes the legal reasoning for repeal and re-directs comments on a replacement rule to a different action. On December 28, 2017, a CPP replacement action was published. The replacement Advanced Notice of Proposed Rulemaking (ANPRM) requests comments, by February 28, 2018, on the regulatory framework and design of a

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

CPP replacement rule. AMP intends to assess the impact of both actions on AMP facilities and provide comments as appropriate..

RICE NESHAP

USEPA originally proposed National Emission Standards for Hazardous Air Pollutants (“NESHAP”) for certain reciprocating internal combustion engines (“RICE”) units in February 2010. While the rule was finalized by the agency in August 2010, the rule was under reconsideration, settlement discussions, and proposal after January 2011. On January 30, 2013, the final reconsidered rule was published in the Federal Register. The RICE NESHAP Rule establishes emission limits and work practice standards for compression-ignited diesel engines and spark-ignited engines at area and major sources nationwide. The diesel engines owned by AMP are affected by this rule and have achieved compliance either through installing control equipment allowing them to operate for demand response and peak shaving purposes or adopting operational limitations which limit them to emergency use.

On May 1, 2015, the D.C. Circuit Court of Appeals vacated USEPA’s regulations providing that stationary emergency Reciprocating Internal Combustion Engines may operate for up to 100 hours per calendar year for purposes of emergency demand response. USEPA moved for a stay of the issuance of the court’s mandate until May 1, 2016, to allow USEPA time to promulgate a replacement rule. The court granted USEPA’s motion, staying the issuance of its mandate until May 1, 2016. AMP is supporting the American Public Power Association’s (“APPA’s”) effort on behalf of its members to oppose the challenges to the rule.

On May 4, 2016 USEPA issued a mandate preventing emergency engines from operating for emergency demand response and deviations in voltage or frequency.

New National Ambient Air Quality Standards

Every five years, the CAA requires USEPA to revise the National Ambient Air Quality Standards (“NAAQS”) for criteria pollutants. Recent NAAQS revisions for ozone and particulate matter (“PM”) have implications for AMP.

USEPA had revised the primary and secondary ozone NAAQS in 2008. On July 23, 2013, the D.C. Circuit Court of Appeals upheld the 2008 NAAQS revision of 0.075 parts per million (“ppm”) as a primary standard but remanded it as a secondary standard. By this time, however, USEPA had begun revising the ozone standard under its 2010 deadline.

On December 17, 2014, USEPA proposed new primary and secondary NAAQS for ozone at 70 ppm, and on October 26, 2015, the final ozone NAAQS was published in the Federal Register, and effective as of December 28, 2015. Many states face an increase in areas designated non-attainment. On November 6, 2017, EPA released a rule finalizing ozone designations for attainment counties and issued an extension for the remaining counties, stating that USEPA was not yet prepared to approve those designations.

USEPA also proposed new NAAQS for fine particulate matter (“PM_{2.5}”) in June 2012 and finalized that NAAQS on December 14, 2012. This action lowered the primary annual PM_{2.5} NAAQS from 15 micrograms per cubic meter (“µg/m³”) to 12 µg/m³. The D.C. Circuit Court of Appeals upheld this revision on May 9, 2014.

Both the revised ozone and PM_{2.5} NAAQS may have an impact on general economic development throughout AMP’s footprint states, based on the final standards. For example, metropolitan or industrialized counties could be designated nonattainment areas under the new ozone and PM_{2.5}

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

standard. This designation could require states to implement additional air pollution rules to effect reductions of nitrogen oxides, volatile organic compounds, sulfur dioxide, and particulate matter.

Cross-State Air Pollution Rule

On April 29, 2014, the U.S. Supreme Court upheld the Cross-State Air Pollution Rule (“CSAPR”), which requires eastern states to reduce sulfur dioxide and nitrogen oxides from coal-fired power plants. In addition to requiring emissions reductions to achieve local compliance, CSAPR imposes additional reductions to achieve compliance in down-wind neighboring states. AMP-managed facilities received an appropriate amount of emission allowances based upon 2014 operations.

In late 2015, USEPA proposed an update to CSAPR to account for additional regional downwind impacts as a result of the revised 2008 ozone NAAQS. The update proposed to substantially reduce the annual and seasonal NOx emission allocations from several Midwestern states, including Ohio. This proposal also requested comment on additional controls on those few days per year when ozone impacts are severe. AMP filed comments on this proposal and met with legislative and state agency officials to discuss AMP’s key areas of interest impacted by the proposed rule.

On September 7, 2016, USEPA released its final CSAPR rule for the 2008 ozone standard. The revised allowance budgets outlined in the final rule are effective for the 2017 ozone season which began on May 1, 2017. AMP-managed facilities received an appropriate amount of allowances. PSEC was largely successful in highlighting the technical errors and deficiencies in USEPA’s draft rule. As a result, PSEC was allocated more allowances than it would have received under the proposed rule, resulting in a reduced possibility that PSGC will have to purchase allowances. PSGC also continues to request that USEPA allocate additional allowances to the facility, potentially further lowering the need for to purchase market-based allowances.

New Source Performance Standards for Stationary Gas Combustion Turbines

USEPA published proposed revisions to the NSPS for combustion turbines on August 29, 2012. The agency took comments on the proposal until December 28, 2012. The proposed revised NSPS would cover combustion turbines located at power plants, pipeline compressor stations, chemical and manufacturing plants, oil fields, landfills, and institutional facilities. AMP filed comments noting that the proposed revisions could limit unit operation and add compliance costs. The timing of USEPA finalizing the NSPS revisions is unknown at this time.

Mercury and Air Toxics Standards Rule

On December 21, 2011, USEPA finalized the Mercury and Air Toxics Standards (“MATS”) rule, which seeks to reduce mercury emissions from power plants through the NESHAP. On June 29, 2015, the U.S. Supreme Court ruled that USEPA interpreted the CAA unreasonably in assessing its legal authority under the statute. The D.C. Circuit Court of Appeals on December 15, 2015, remanded the rule back to USEPA without vacating it, so it remains in effect while it is undergoing revision. On April 14, 2016 USEPA issued a final finding that it is appropriate and necessary to set standards for emissions of air toxics from coal- and oil-fired power plants. This finding responds to a decision by the U.S. Supreme Court that the EPA must consider cost in the appropriate and necessary finding supporting the Mercury and Air Toxics Standards. The PSEC has demonstrated compliance with this rule.

Effluent Limitations Guidelines and Standards for the Steam Electric Power Generating Point Source Category

On June 6, 2013, USEPA proposed a rule under the Clean Water Act (“CWA”) that would limit effluent discharges from steam electric generating units (including combined cycle natural gas).

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

AMP filed comments on the proposed rule on September 19, 2013. USEPA agreed to take final action on the rulemaking by December 31, 2015 (per a consent decree), and ultimately issued the final Steam Electric Effluent Limitations Guidelines rule on that date. Impacts to AMP facilities are expected to be limited.

Clean Water Rule

In April 2014, USEPA and the U.S. Army Corps of Engineers jointly proposed the Clean Water Rule to redefine and “clarify” certain definitions and applicability of definitions to various “waters of the United States,” a term used in the CWA. The rule would greatly expand the scope of the CWA to impact a variety of development and construction activities, including electric system transmission and distribution lines. Comments on the proposed rule were due on November 14, 2014; AMP worked with the APPA to provide comment.

The final Clean Water Rule was published in the Federal Register on June 29, 2015, and was set to become effective August 28, 2015. However, on August 27, a North Dakota federal judge temporarily blocked the rule’s implementation, ruling that the states would likely suffer if it took effect and that they are likely to succeed when their underlying lawsuit against the rule is decided. USEPA interpreted the decision to only apply to the 13 states that requested the injunction (none of which are in AMP’s footprint), and started to move forward with enforcement of the rule in remaining states. However, on October 9, 2015, the U.S. Court of Appeals for the Sixth Circuit issued a nationwide stay on the Clean Water Rule pending judicial review of the rule. On April 21, 2016, The U.S. Court of Appeals for the Sixth Circuit issued an order that challenges to the water rule belong with it, rather than to first be heard in district courts. That order was appealed to the US Supreme Court (SCOTUS) who, on January 28, 2018 ruled that WOTUS litigation should first be directed through district courts which effectively invalidates the national stay previously issued by the Sixth Circuit decision.

President Donald Trump and new USEPA Administrator Scott Pruitt have communicated their opinion that the Clean Water Rule, WOTUS, is beyond the legal authority Congress granted to the USEPA. On February 28, 2017, President Trump signed an executive order criticizing the Clean Water Rule as a federal overreach and instructing a review of the rule.

On June 27, 2017, USEPA and the U.S. Army Corps of Engineers issued a proposed rule to rescind, the 2015 definition of WOTUS rule. The proposal would maintain the status quo, since the prior regulatory language is currently in place. On February 1, 2018, USEPA and the Army Corps of Engineers (USACE) finalized a rule that delays the effective date of the 2015 WOTUS rule by two years. This action provides the agency with additional time to continue reconsideration of the rule.

FWS and NMFS Proposed Rules/Policy on Critical Habitat

Two proposed rules and a draft policy related to designations of critical habitat under the Endangered Species Act (“ESA”) were issued on May 12, 2014, jointly by the U.S. Fish and Wildlife Service (“FWS”) and the National Marine Fisheries Service (“NMFS”).

Together, the three proposals could expand the discretion of the FWS and NMFS to designate areas as “critical habitat” under the Endangered Species Act, including actions that could change designations after certain development. AMP is monitoring the proposed changes for any potential impacts on projects and development.

On June 21, 2017, the Department of Interior (DOI), announced implementation of the vision set out by President Trump in Executive Order (E.O.) 13777, “Enforcing the Regulatory Reform

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

Agenda” by seeking input from entities significantly affected by Federal regulations, on what regulations may be appropriate for repeal, replacement, or modification. AMP filed comments in response to this request.

Coal Combustion Residuals or Coal Combustion Waste Disposal Rule

On December 19, 2014, USEPA issued a final rule under Subtitle D of the Resource Conservation and Recovery Act that would regulate Coal Combustion Residuals (“CCR”), which includes fly ash, bottom ash, boiler slag, and flue gas desulfurization materials, as nonhazardous. On October 19, 2015, the rule became effective, six months after publication.

On July 26, 2016, the USEPA Administrator signed a direct final rule and a companion proposal to extend for certain inactive CCR surface impoundments the compliance deadlines established by the regulations for the disposal of CCR under subtitle D of the Resource Conservation and Recovery Act (“RCRA”). The rule became effective on October 4, 2016.

The final rule impacts coal-fired power plants with ash storage ponds or landfills due to heightened design criteria. Surface impoundments and landfills containing CCR face enhanced monitoring and assessments. Impacts to AMP assets are expected to be limited.

Other Commitments

IHP/CJMahan Litigation

On October 20, 2015 IHP Industrial, Inc. (“IHP”) filed a complaint against C.J. Mahan Construction Company, LLC (“CJMahan”) and AMP in connection with AMP’s Smithland Hydroelectric Project (“Smithland”). The complaint was filed in U.S. District Court, Southern District of Ohio, Eastern Division. On October 29, 2015, CJMahan filed its answer and a cross claim against AMP relating to additional construction activities and potential latent defects by CJMahan on Smithland. AMP has filed its answer to IHP’s claims denying liability to IHP. AMP has also denied liability with respect to CJMahan’s cross claims and has filed its own cross claims against CJMahan related to potential latent defects by CJMahan and CJMahan’s claims against AMP. As of November 6, 2017, all claims in this matter have been settled and dismissed with prejudice.

Aldridge Litigation

On September 16, 2016, Plaintiff Aldridge Electric, Inc. filed a state mechanic’s lien and public improvement mechanic’s lien in Livingston County, Kentucky. On September 21, 2016, Aldridge initiated a lawsuit against AMP by filing a complaint in Kentucky state court in Livingston, Kentucky. AMP promptly removed Aldridge’s state court action to the U.S. District Court for the Western District of Kentucky.

Aldridge alleges the following causes of action against AMP: (1) declaratory judgment that AMP’s issuance of default and termination were unjustified, that any waivers were null and void, and that AMP owes Aldridge for work performed on the Project; (2) foreclosure of a mechanic’s lien on AMP’s interest in and improvements to the Project property; (3) in the alternative, foreclosure of a public improvement mechanic’s lien; (4) breach of contract with respect to the amounts allegedly owed Aldridge for work performed on the Project; and (5) in the alternative, unjust enrichment.

On November 7, 2016, AMP filed a motion to transfer the case to the U.S. District Court for the Southern District of Ohio pursuant to the Ohio forum-selection clause in Aldridge’s contract. This motion to transfer is still pending with the Court. On November 9, 2016, AMP and Aldridge agreed to jointly stay the action. The stay was lifted on January 4, 2017.

American Municipal Power, Inc.

Notes to Consolidated Financial Statements

Years Ended December 31, 2017 and 2016

On January 24, 2017, Aldridge filed an amended mechanic's lien and public improvement mechanic's lien in Livingston County for the principal amount of \$5,025,656 plus interest and attorney's fees. The same day, Aldridge filed a motion for leave to file an amended complaint. The amended complaint asserts the same claims as Aldridge's original complaint and seeks the amount expressed in the amended mechanic's liens plus additional money for work allegedly performed by Aldridge for a total of \$7,083,968. As of August 23, 2017, all claims in this matter have been settled and dismissed with prejudice.

Walsh Mechanic's Lien

On January 31, 2017, Walsh Construction Company recorded in the Hancock County, Kentucky clerk's office its Statement and Notice of Mechanic's Lien in regard to the Cannelton Hydroelectric Project, in the amount of \$20,105,357, plus interest, costs and attorneys' fees. No enforcement action has been taken by Walsh with respect to this mechanic's lien. On July 11, 2017, AMP and Walsh settled these claims and a final change order was executed that contains a final reconciliation and mutual releases. A release of the Mechanics' Lien was recorded on July 25, 2017.

All costs associated with this resolution are project costs recoverable from the project participants under their power sales agreement with AMP.

Voith Litigation

On August 14, 2017, after the expiration of a tolling agreement and exhaustion of informal resolution efforts, AMP filed a complaint against Voith Hydro, Inc. (Voith) in federal court in Columbus, Ohio alleging breach of contract and breach of express warranty claims against Voith for each of the four hydro projects. AMP's breach of contract claim states that Voith materially breached the contracts on the projects as follows:

- (a) delivering drawings and equipment late and out of sequence;
- (b) delivering defective, incomplete and uncoordinated drawings and defective installation instructions;
- (c) delivering defectively manufactured guide bearings and discharge rings;
- (d) defectively designing and/or manufacturing equipment and equipment components;
- (e) delivering equipment that was not completely and/or properly manufactured and required significant additional field work to install;
- (f) failing to deliver "Category C" parts necessary for Voith Equipment assembly;
- (g) failing to timely and completely address installation issues with the Voith Equipment, including but not limited to, failing to timely and completely address turbine alignment issues;
- (h) failing to provide check sheets consistent with the Contracts' specifications;
- (i) refusing to promptly and accurately address problems with the Voith Equipment; and
- (j) failing to maintain a consistent executive and project management team and site representatives who were informed and prepared to address ongoing issues; and causing substantial delay and damage to the Hydro Projects, all in material breach of the Contracts.

The Complaint alleges that Voith's material breaches caused extensive damages to AMP. The Complaint notes that the contracts entitled AMP to withhold payment from Voith, and AMP withheld approximately \$40 million in payments from Voith to offset the damages and costs incurred by AMP

and its general contractors due to Voith's material breaches of the Contracts. The Complaint alleges that AMP's damages are at least \$40 million.

Voith filed its Answer and Counterclaim on October 16, 2017. Voith's Answer denied AMP's claims, and Voith's Counterclaim for breach of contract and unjust enrichment made the following allegations against AMP:

- a) that a series of material interferences, hindrances, delays and defective performance by AMP, MWH and other Installation Contractors adversely impacted Voith, absolve Voith from liability to AMP, and make AMP liable to Voith;
- b) that AMP materially breached its contract with Voith by inappropriately modifying and increasing Voith's scope of work and refusing to pay Voith for the added scope and legitimate requests for additional payments;
- c) that AMP has failed and refused to pay the balance of the contract price and other amounts owed to Voith under the contract; and
- d) that Voith has been damaged in an amount in excess of \$40M, plus interest and attorney fees.

On December 1, 2017, AMP filed its Answer and denied liability to Voith. On December 5, 2017, the Court held a preliminary pretrial conference. At this conference AMP and Voith discussed their differing views on certain discovery issues and the case schedule. For instance, Voith has asked the Court to extend the limit on the number of depositions a party can take from 10 to 80, while AMP was willing to extend the limit from 10 to 25. The Court deferred ruling at this time on these discovery issues and set a status conference for April 19, 2018 to allow time for the parties to begin exchanging written discovery and electronically stored information. At the April 19, 2018 conference, the Court is expected to rule on any remaining discovery disputes and establish a case schedule.

On January 30, 2018, the parties exchanged initial disclosures that listed potential witnesses and provided preliminary damage calculations. Voith listed over 100 potential witnesses, and Voith identified over \$65 Million in damages based upon claims for outstanding Change Requests and Work Change Directives on the hydro projects. (Cannelton: \$19.5M; Smithland: \$20.5M; Willow Island: \$10.7M; Meldahl: \$14.6M). AMP listed over 70 potential witnesses, and AMP identified over \$90M in gross damages, without including any contractual limitations or caps on damages. (Cannelton: approx. \$32M; Smithland: approx. \$25M; Willow Island: approx. \$25M; Meldahl: approx. \$22M). Both sides are claiming pre-judgment and post-judgment interest and other damages and all damage calculations will be the subject of expert witness reports.

Also on January 30, 2018, the parties exchanged lists of custodians and search terms that will be used with respect to discovery and the collection and production of documents and electronically stored information. The parties are currently meeting and conferring on these lists and terms.

AMP will vigorously pursue its claims and defend against Voith's Counterclaim. All legal costs and expenses are project costs recoverable from the project participants under their power sales agreements with AMP. Likewise, any damages recovered from Voith inure to the benefit of the project members, and any damages payable to Voith are project costs recoverable from the project participants.

Other

AMP is also a party to various legal actions and complaints arising in the ordinary course of business. AMP does not believe that the ultimate resolution of such matters will have a material adverse effect on AMP's financial position or results of operations.

15. Power Purchase Commitments

AMP's general practice is to enter into long-term power purchase contracts only when such contracts are supported by corresponding sales contracts to its members. All such contracts are considered normal pursuant to the FASB's standard on derivative instruments. All such purchases are "covered" by corresponding power sales arrangements either with individual members or one of AMP's power pools.

Energy purchase commitments at December 31, 2017 are as follows:

2018	\$ 209,154,442
2019	192,734,053
2020	161,881,893
2021	118,566,830
2022	138,881,854
2023-2030	<u>285,729,253</u>
	<u>\$ 1,106,948,325</u>

AMP has certain power supply agreements that include provisions that would require collateral upon a decrease in AMP's credit rating below investment grade, or power prices below certain thresholds.

AMP has also entered into long-term natural gas purchase contracts to provide fuel for AFEC. Natural gas purchase commitments at December 31, 2017 are as follows:

2018	\$ 37,540,105
2019	39,334,090
2020	37,180,230
2021	36,946,080
2022	30,501,480
2023-2027	<u>54,045,480</u>
	<u>\$ 235,547,465</u>

16. Subsequent Events

The Company has evaluated subsequent events through April 19, 2018 as this was the date the consolidated financial statements were available to be issued.
